

Workers' Comp Claims Management Program

Purpose of the Workers' Compensation (WC) Claims Management Program

To protect workers and employers by providing Workers' Compensation services in a manner that is professional, sensitive, responsive and effective. SCI understands that appropriate treatment, expedient recovery and a fitting [return to work](#) timeline for each employee is the optimum outcome for all parties.

Goal

To provide excellent Claims Management by continuously monitoring the process to identify opportunities for cost control and closure.

Benefits

If any incident should occur, our processes assure the employee that the employer has his/her best interest in mind and his/her rights will be protected all the times. To ensure an injured employee receives timely treatment by qualified medical professionals and also allows constant management of claims which decreases the possibility of employee malingering or abuse of WC benefits.

Specifics

Our processes ensure thorough intake, reporting, monitoring and management of each claim. Each reported claim is assigned to an SCI WC team member who will manage all the actions related to the claim and follow through till the claim is resolved. Team members notify our Carriers and Case Managers who provide early intervention in incidents and guide the injured workers through medical treatment, rehabilitation, [return to work](#) and full recovery.

This program includes:

- Awareness Training
- Safety Consulting
- Loss Runs
- Claims Reviews
- All necessary forms

Our successes have been built on our motto: ***Safety is No Accident – It's a Way of Life!***
